

```

import java.sql.*;

public class QueryPasti {
    public static void main(String[] args) {
        String url = "jdbc:mysql://localhost:3306/pasti"; // Cambia porta/host se necessario
        String username = "root"; // Inserisci il tuo username del DB
        String password = "password"; // Inserisci la tua password del DB

        String query = "SELECT * FROM pasti";

        try (Connection conn = DriverManager.getConnection(url, username, password);
            Statement stmt = conn.createStatement();
            ResultSet rs = stmt.executeQuery(query)) {

            while (rs.next()) {
                System.out.println("Nome: " + rs.getString("nome") + ", Tipo: " +
rs.getString("tipo"));
            }

        } catch (SQLException e) {
            e.printStackTrace();
        }
    }
}

```
